## QUALITY MANAGEMENT SYSTEM RECERTIFICATION

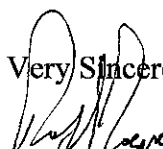

Perry Johnson Registrars (PJR) of Southfield Michigan has recertified Wisconsin Plating's Quality Management System to ISO 9001-2000 w/o Design on August 25, 2006. Terry Boboige, President of PJR, signed certificate #C2006-02159.

The term of certification is for three years and expires August 24, 2009. Every 6 months surveillance audits are conducted by auditors of PJR.

Audit Team Leader Maria Williams-Bell commented that Wisconsin Plating is "a shining example of a mature, well planned and well implemented Quality Management System" after the November 15, 2006 surveillance audit.

Our next audit in May 2007 will include our Racine Plating Division for the first time and will include the electroplating capabilities of Copper, Nickel, Chromium, Zinc and Zinc Alloys with Hexavalent and Trivalent Chromates, Black Oxide, Passivating, Zinc Phosphating, Degreasing, Tumbling, Burnishing and Baking.

Very Sincerely,

Robert J. Toeppe  
President
